Boosters with Vertical Pumps

EBITT was born from “an idea” and turned into “an ideal”

EBITT is a specialized organization with deep expertise in pump and fluid technologies, capable of accurately interpreting both Turkish and global market demands and translating them into the right solutions.

Founded to be the ideal intersection of supply and demand in fluid technologies, EBITT goes beyond developing and marketing products. It represents a holistic business model built to meet expectations at the highest level.

More than a company, EBITT is a perspective, a system, and a spirit. Its foundation is human capital and accumulated expertise, transferred sustainably like a relay race rather than treated as a traditional capital asset.

For EBITT, innovation is not limited to technological advancement. It is a creative, value-driven approach that prioritizes responsibility, customer expectations, business efficiency, and uncompromising standards for health and safety. Every innovation emerges from this integrated understanding.

Quality, for EBITT, is a non-negotiable standard in all areas involving water and fluids—throughout life. Together with its suppliers, customers, and team members who share this philosophy, EBITT builds long-term, sustainable win-win relationships.

With this mindset, EBITT offers a wide range of products and systems, from basic solutions to process-specific equipment, serving residential, industrial, agricultural, irrigation, pool, treatment, and specialized applications. Beyond standard products, EBITT also delivers tailor-made solutions that maximize added value.

EBITT believes the ideal solution is not always the most expensive one, but the most rational—optimizing needs in the most efficient way.

Positioning itself as a trusted solution provider, EBITT stands out with its values, flexibility, and dynamic structure, ready to respond to evolving demands.

BOOSTERS WITH VERTICAL PUMPS

DC1/DC2/DC3-MV

- MV Series packaged booster sets are assembled with vertical, multistage pumps featuring plastic impellers.
- DC1: Single Pump System
- DC2: Twin Pump System
- DC3: Triple Pump System
- The pumps are mounted on a common base frame, with each pump supplied complete with suction and discharge isolation valves and a check valve.
- In multi-pump systems, suction and discharge manifolds are included in the scope of supply.
- Control and automation panels are included as part of the delivery.

MV 710	4	5,5	8,9			130	127	124	121	114	103	86	66	41

WDRIVE1/2/3 MV

FREQUENCY CONVERTED PACKAGE
BOOSTERS WITH VERTICAL PUMPS

WDRIVE1/2/3 MV

- MV Series frequency converter-controlled packaged booster sets are assembled with vertical, multistage pumps featuring plastic impellers.
- WDRIVE1: Single Pump System
- WDRIVE2: Twin Pump System
- WDRIVE3: Triple Pump System
- Each pump is equipped with an integrated WDRIVE frequency converter and an analog pressure sensor.
- The pumps are mounted on a common base frame and supplied complete with suction and discharge isolation valves and check valves.
- In multi-pump systems, suction and discharge manifolds are included in the scope of supply.
- Constant pressure comfort is achieved through the WDRIVE device, while energy savings are realized by variable speed control.
- WDRIVE devices enable communication between pumps, provide self-protection functions, and ensure communication with the building automation system.
